Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1 "30 pm" appears to be erroneous, because page 3 lines 7-9 of the specification appears to be drawn to a different particle size range; and "the same kind of conditions" lacks clear antecedent basis. Claim 1 is considered incomplete because it is essential that the instant method include steps for adding gypsum to a slurry of the iron precipitate, and filtering the slurry containing the iron precipitate and gypsum. Claims 2-5 depend from the above claims.

Claim 1 properly written to overcome the above 35 USC 112 rejection, would be allowable.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
